EDUCATION

Colby College, Waterville, ME, Class of 2021
Bachelor of Arts, Majors: Physics & Mathematics, Minor: Statistics **GPA: 4.15/4.00**

Relevant Coursework: (*) denotes "Independent Study"

- **Physics:** Quantum Information, Quantum Mechanics, Massive Gravity*, Topics in Classical Field Theory*, General Relativity, Classical Mechanics, E&M, Thermo & StatMech, Special Relativity & Quantum Physics
- **Mathematics:** Algebraic Geometry, Abstract Algebra, Real & Complex Analysis, Ordinary & Partial Differential Equations, Matrix Analysis, Linear Algebra, Probability, Vector Calculus, Honors Calculus
- **Statistics:** Statistical Inference (theory), Applied Longitudinal Data Analysis, Statistical Modeling

EXPERIENCE

Summer School, Perimeter Institute for Theoretical Physics *Jun 2020*

- Topics: Path Integrals, Quantum Information, Numerical Methods, Symmetries.

†**Undergraduate Researcher, Perimeter Institute for Theoretical Physics** *N/A, canceled due to COVID-19*
PI: Timothy Hsieh

- Topic: Quantum many-body physics on quantum hardware

Research Assistant, Colby College Department of Mathematics & Statistics *Oct 2019—*
PI: Evan Randles

- Convolution powers of complex functions & related topics in harmonic analysis
- Compute convolution powers & highly oscillatory associated attractors
- Generate examples indicative of a new local limit theorem
- Proving a new local limit theorem

Research Assistant, Joint Quantum Institute - NIST & Univ. of Maryland, College Park *Summer 2019, Jan 2020*
PI: Steven Rolston, University of Maryland, College Park

- Studying ∞-range interactions of Rb near an optical nanofiber (ONF) via collective decay measurements
- Built a polarization optimization system for a future ONF standing-wave dipole trap
- Developed an stand-alone experimental control program with NI-DAQmx in Python

Research Assistant, Colby College Department of Physics & Astronomy *Nov 2017—*
PI: Charles Conover

- 2017-2019: Precision measurement experiments on ultracold potassium in Rydberg states
- 2019-2020: Lifetime measurements of ultracold potassium $4p$.
- Data acquisition & analysis; Built ECDL's & frequency-stabilizer electronics for ECDL's
- Controlled photon-counting modules, waveform generators for MOT field-switching, spectroscopy, etc.

Teaching Assistant, Colby College Dept. of Physics & Dept. of Math & Stats *Sep 2017—*

- Current course: Ordinary Differential Equations & Modern Physics II
- Past courses: Linear Algebra, Modern Physics I & II, EM & Optics, Intro to Mechanics
- Grade psets and conduct weekly TA sessions; Prepared lab equipment for EM & Optics

Physics & Math Tutor, Colby College Dean of Studies *Nov 2018—*

- Provide academic assistance through reviewing course material and solving problems

Math Mentor, Colby College Department of Mathematics & Statistics *Sep 2019—*

PROJECTS

Personal Website/Archive, GitHub, huanqbui.com: notes from class and independent readings plus other projects.
Experimental Physics: Advisor: Charles Conover; Lifetime measurements of ultracold potassium $4p$
Theoretical Physics: Advisor: Robert Bluhm; Massive Gravity
Applied Mathematics: Advisor: Evan Randles; Convolution powers of complex functions & harmonic analysis

HONORS, AWARDS, FUNDS

Phi Beta Kappa *Apr 2020*
Linda K. Cotter Internship Fund, for Jan 2020 internship at JQI *Jan 2020*
Phi Beta Kappa Scholastic Achievement Award *Sep 2019*
Julius Seelye Bixler Scholar *Sep 2018, Sep 2019*
Meritorious Winner, COMAP Mathematical Contest in Modeling *S'19*
Dean's List *F'17, S'18, F'18, S'19, F'19*

CONFERENCES/PRESENTATIONS

DAMOP20: Measurements of f-, g-, and h-state quantum defects in Rydberg states of ^{39}K.
CLAS 2020: Massive Gravity (*canceled due to COVID-19*)
CLAS 2020: Topics in Quantum Information (*canceled due to COVID-19*)
DAMOP19: Millimeter-wave precision spectroscopy of d-d transitions in potassium Rydberg states
CLAS 2019: Matrices in Quantum Computing: A 2-qubit entanglement circuit
CUSRR2018: Precision measurement of potassium energy levels at highly excited states

SKILLS

Technical: IGOR Pro, R, Python, NI-MAX, Mathematica, LaTeX, Adobe Illustrator, HTML & CSS, MS Office
Languages: English (fluent/proficient), Vietnamese (native)
