

1st Sound

NF

The diagram illustrates a signal processing concept. A green bell-shaped curve represents an overall envelope or window. Inside this envelope, there are two overlapping waveforms. The bottom waveform is blue and labeled 'SF'. The top waveform is red and labeled 'NF'. The red waveform is positioned such that it is mostly within the green envelope, with its peaks slightly exceeding the top of the envelope. The blue waveform is also mostly within the green envelope, with its peaks slightly below the bottom of the red waveform. The text '1st Sound' is centered at the top of the image.
